
Informal Meeting of EU Ministers Responsible for Territorial Cohesion and Urban Matters

Declaration of Ministers towards the EU Urban Agenda

Riga, 10 June 2015

Preamble

On 10 June 2015, in Riga (Latvia), upon the invitation by the Latvian Presidency of the Council of the European Union (EU), the session of the Informal Meeting of Ministers responsible for territorial cohesion and urban matters was held.

The meeting was also attended by the European Commissioner for Regional Policy and representatives from the European Parliament (EP), Committee of the Regions (CoR), European Economic and Social Committee (EESC), European Investment Bank (EIB), as well as representatives from candidate countries for EU membership, Norway and Switzerland, relevant stakeholder organisations and several observers.

Cities and towns play a significant role in territorial development of the EU, also in achieving the EU 2020 objectives, due to the concentration of people, services, dwellings, economic activity and transport nodes. They are first and foremost human settlements that should be developed to improve the living conditions and the environment of its present and future citizens. On the other hand they face different challenges which require purposeful and coordinated action at all governance levels. In the main the responsibility for urban development sits with Member States. However EU policies also have an important role in setting the right framework within which European urban areas can tackle urban challenges and unlock their growth potential. In that regard it is important to develop an Urban Agenda at EU level, leading towards better policies for urban areas, more coordinated and effective measures in support of sustainable development, better participation and contribution of urban areas in achieving common EU goals, exchange of knowledge and increase learning. Meanwhile it is essential to ensure that the future EU Urban Agenda is made in full respect of the subsidiarity principle and competences under the EU Treaties, taking into account the intergovernmental cooperation on the issue, as agreed with the General Affairs Council conclusions on 19 November 2014. Moreover, according to the European Council conclusions adopted on 26/27 June 2014, in line with the principles of subsidiarity and proportionality, the Union must concentrate its action on areas where it makes a real difference. It should refrain from taking action when member states can better achieve the same objectives.

This Declaration provides political support for the development of the EU Urban Agenda in full respect of the principles of subsidiarity and proportionality and takes account of the intergovernmental work of Member States on the *Urban Acquis* so far. Particular attention within this declaration is paid to the Presidency TRIO's (Italy-Latvia-Luxembourg) common priority – small and medium sized urban areas, as an integral part of the EU Urban

Agenda, acknowledging their significant role and potential for balanced territorial development and achievement of common European goals.

Ministers acknowledge:

1. The role of urban areas in fostering sustainable economic, social and territorial cohesion of the European Union, developing the EU Urban Agenda and implementing EU and national policies.
2. The relevance of the polycentric urban structure of the EU and its contribution in achieving the goals of the Territorial Agenda 2020, also the importance of all types of urban settlements as centres for services, economic opportunities and culture for their surrounding areas.
3. The important position urban areas will hold in the universally applicable Post 2015 Development Agenda and the Sustainable Development Goals, in order to make them safer, more resilient, inclusive and sustainable.
4. The efforts made by consecutive Presidencies on intergovernmental cooperation on sustainable and integrated urban development and their contribution to the policy debate on sustainable cities, climate change and energy efficiency, integrated urban regeneration, demographic challenges, intra-EU mobility and migration, urban poverty, child poverty and challenges of inner areas.
5. The work carried forward by the Presidency TRIO (Italy-Latvia-Luxembourg) on small and medium sized urban areas, recognising their significant role and potential for balanced territorial development and achievement of common European goals, and supporting the conclusions attached to this Declaration (Annex I).
6. The important role of the Committee of Regions, EUROCITIES, the Council of European Municipalities and Regions, European Economic and Social Committee in voicing the interests of urban areas and regions; also the ongoing relevant work of URBACT, ESPON, EUKN, etc.

Ministers recognise the need:

7. To work towards the EU Urban Agenda, that considers the urban dimension in European and national policies in an integrated way, in order to help realise the full potential and contribution of urban areas of all sizes, including small and medium sized urban areas, towards achieving common European and national objectives in full respect of subsidiarity and proportionality.
8. For an effective coordination of EU policies with an impact on urban development within the European Commission reflecting the horizontal, cross-sectorial and territorial nature of urban issues.
9. To improve the existing legal framework with an urban impact and to use the existing structures instead of creating new ones at the EU level, in order to foster more effective policies in support of sustainable and integrated urban development.
10. For integrated and place-based policies adaptable to different needs of urban areas and their inhabitants, making the most of the territorial potential across Europe.
11. For coherence between urban and other territorial issues, building on the important role of urban areas, including small and medium sized urban areas, for a better territorial development.

Ministers agree:

12. To support the development of the EU Urban Agenda that:
 - 12.1. should be taken forward in close partnership among Member States, the Commission, the EIB, regions, urban authorities and other concerned stakeholders, in conformity with the principles of subsidiarity and proportionality;
 - 12.2. respects urban diversity and specificities, as well as contributes to unlocking the potential of all types of urban areas, including small and medium sized, also the most vulnerable and deprived neighbourhoods;
 - 12.3. is aimed at opportunities that urban areas offer in terms of wider territorial development, jobs, growth and innovation, not only at tackling urban challenges;
 - 12.4. demonstrates the shared understanding of sustainable and integrated urban development, and seeks to ensure a good quality of living and working environment for citizens;
 - 12.5. provides an operational framework and effective instruments to horizontally improve the urban dimension in European policymaking, including better policies, territorial impact assessment, more tailor made and place sensitive EU-funds, including EIB finance, opportunities to exchange knowledge and best practices, research, and cooperation;
 - 12.6. does not create administrative burden to national, regional or local governments;
 - 12.7. promotes cooperation among urban areas of all sizes, as well as cooperation within functional urban areas and regions, including inner areas and cross-border polycentric metropolitan regions.
13. To strengthen the intergovernmental cooperation on urban and territorial development, in order to provide a clear contribution to the development and implementation of the EU Urban Agenda.
14. To promote the knowledge base and the data on urban development issues, referring to different types of urban units.
15. To support policies, at national or regional level, that have an impact on and that promote sustainable and integrated urban development and territorial cohesion, and contribute to the overall EU strategic objectives, raising awareness and fostering the coordination of sectors.
16. In accordance with the legal and institutional frameworks of the Member States, with appropriate means, to:
 - 16.1. support effective multi-level governance and to involve local and regional authorities in policy making, including the design, implementation and monitoring of urban policies and policies with a clear urban impact;
 - 16.2. facilitate adequate capacity in local and regional authorities, including by greater use of, and participation in EU European Territorial Cooperation programmes, to enable them to elaborate and implement integrated development strategies and perspectives where appropriate, and to foster favourable preconditions for cooperation among different territories in order to manage territorial interdependencies and complementarities;
 - 16.3. facilitate integrated and place-based territorial support measures that enable any type of territory to make most of its territorial potentials and address its specific challenges, including small and medium sized urban areas, independent of their

geographical location.

17. To ensure continuity in the development of the EU Urban Agenda during the upcoming Presidencies and to identify the most important milestones for creating the Urban Agenda, and strive for a political agreement during the Dutch Presidency on an operational EU Urban Agenda.
18. To contribute to the UN-Habitat New Urban Agenda process aiming to ensure that the principles of integrated urban development and the forthcoming Sustainable Development Goals referring to urban development are well reflected in the Habitat III declaration.

Ministers invite the European Commission:

19. To make the EU Urban Agenda a priority and take concrete and immediate steps to:
 - 19.1 improve coordination and effectiveness of EU policies and instruments with an urban impact to support sustainable and integrated urban development and contribution of urban areas to EU priorities;
 - 19.2. enhance ex-ante impact assessment of new EU initiatives and legislation with regards to their territorial impacts and consequences for local authorities; and
 - 19.3. strengthen, consolidate and harmonise the knowledge base and the data on urban development issues at the EU level, referring to different types of urban units.
20. To initiate and facilitate concerted actions in a limited number of cross-sectorial priority issues to be identified and selected in close cooperation among Member States, the Commission and other concerned stakeholders. In doing so:
 - 20.1 also take into account the recommendations prepared at the intergovernmental level among others those specific to small and medium sized urban areas, urban poverty (including in the most deprived neighbourhoods), intra EU mobility and adverse effect of migration; and
 - 20.2. make use of the relevant knowledge base of the Urban Audit, URBACT, ESPON, EUKN etc.
21. To monitor the contribution of urban areas to the strategic objectives of the European Union, follow - up and report on the progress of activities in the cross - sectorial priority issues and report back to Member States on a regular basis through the Urban Development Group. In undertaking monitoring activities to seek to minimise the administrative burdens on Member States.
22. To ensure that EU level regulations and instruments are flexible and place-sensitive, which allow Member States and regions to implement national and sub-national strategies and perspectives facilitating development of all types of territories, including small and medium sized urban areas.

Ministers invite local and regional authorities:

23. To actively contribute, through existing governance mechanisms, to the development of the EU Urban Agenda by identifying major urban challenges and opportunities that are both rooted in the local reality and broadly shared by cities and towns across Europe.
24. In accordance with the legal and institutional framework of the Members States, where appropriate and where resources allow, to:
 - 24.1. play an active role in policy development and territorial impact assessment where

those policies have an impact on urban areas and in which European collaboration has a clear added value;

24.2. provide partnership in sustainable integrated urban development on the ground involving local community and stakeholders, and aiming to deliver effective urban solutions to challenges that go beyond one sector and administrative borders;

24.3. elaborate and implement integrated local strategies using a participatory approach, that is responsible and well-balanced in terms of spatial planning, respecting local assets and using existing tools for promoting sustainable development of urban area and its hinterlands;

24.4. take into account the strategic objectives for a smart, sustainable and inclusive Europe in local development strategies, connecting EU strategies and policies with the local specificity and the citizens;

24.5. strengthen cooperation and networking among urban areas, urban and rural areas, also with partners across Europe, looking for comparative advantages and synergies to exploit together; to share good practices in tackling urban challenges and jointly build capacity; participate to the Urban Development Network; where helpful, to use the European level web based tool the Reference Framework for Sustainable Cities, developed by the EU Member States.

24.6. consider joining the EU level initiatives covering essential urban challenges, such as the “Declaration of mayors against child poverty”.

Annex I

Acknowledgement of the significant role of small and medium urban areas in the overall territorial development¹

1. The essential **role of SMUAs** has so far been less explored both in policies and studies which up to now have focused on the role and issues of metropolitan areas and large cities. In Europe 24.2% of the inhabitants live in SMUAs with a population of 5,000 to 50 000. In total there are 8,350 SMUAs in Europe.
2. SMUAs fulfil **important economic and social functions** being centres for jobs, public and private services, nodes of local transport, as well as centres for local and regional knowledge production, innovation and infrastructure for a large share of the European population.
3. SMUAs are, therefore, **essential to avoid rural depopulation and urban drift**, promoting more balanced overall regional development. Yet they also **contribute to development of metropolitan areas** being connected in a polycentric network.
4. There is a **significant existing and potential collective contribution of SMUAs to EU common strategic goals**, especially regarding employment, climate change and energy sustainability and fighting poverty and social exclusion.
5. **Many SMUAs face a range of common challenges that need to be addressed** at different governance levels: declining and ageing population, emigration of young people, low economic activity and diversity, lack of highly educated and skilled labour, job creation, provision of and access to services, insufficient connectivity, lack of access to financial resources and capital investments, insufficient administrative and technical capacity, energy transition and climate change.
6. SMUAs have significant development **potentials that need to be utilised**: great opportunities for balancing economic activity and quality of life aspects, more flexibility to shift development orientation and more agility for policy innovation and experimentation.
7. It is **especially important for development of SMUAs** to foster diversification of economic activities and smart specialisation; find solutions for provision of qualitative, accessible and cost-efficient public services; to foster urban-urban, urban-rural, including inner areas, and cross-border co-operation within functional areas and to generally improve their attractiveness. Strong capacity of local authorities and active involvement of local community and stakeholders in development of the territory are essential in this regard.
8. It is important to provide **territorial support measures** that are comprehensive and flexible enough to enable any type of territory – urban, rural and areas with specific geographic features – **to make the most of their territorial potentials**.
9. Due to interdependency of SMUAs and other territories and their multi-sectoral challenges **support measures need to be provided** in the form of **integrated and place-based mechanisms**.

¹ In order to facilitate discussion and provide evidence base for it Latvia has elaborated a research report “Challenges of Small and Medium-Sized Urban Areas, their economic growth potential and impact on territorial development in the European Union and Latvia”. Based on the report a number of observations and conclusions can be made.
